"
(Quote that takes the reader right into the middle of action!)

I want to save the world by majoring in $\frac{1}{(Major\ with\ "Bio"\ in\ it)}$ at the $\frac{1}{(Unrealistic\ university)}$. I first got interested in $\frac{1}{(Major)}$ through my internship at the $\frac{1}{(Long\ last\ name)}$ research center at Stanford University. My research focused on using $\frac{1}{(Noun)}$ to stop cancer cells from $\frac{1}{(Vorb)}$. I didn't really work but I learned a lot about STEM and entering stuff into Excel.

I got interested in research after the death of my $\frac{1}{(Close\ but\ not\ super\ close\ relative)}$. It was very sad.

I also learned about life from playing $\overline{(Kinda\ irrelevant\ sport)}$. It was hard and I had to work a lot. Sometimes it wasn't great, especially when I broke my $\overline{(Nonessential\ appendage)}$ and had to sit out. This was all worth it when we did ok at the $\overline{(V\ aguely\ impressive\ local\ tournament)}$.

Another thing that gave me perspective was my service trip to $\frac{Poor\ sounding\ country}{Poor\ sounding\ country}$. After spending \$3000 on a flight there, I was able to donate \$100 to a local village. One experience that really stood out to me was meeting a small child named $\frac{Pool\ country}{Pool\ country}$. He was missing a $\frac{Pool\ country}{Pool\ country}$ and he lived in a

 $\overline{(Small\ storage\ container)}$ but he still had a positive attitude. When I handed him the used Hooters t-shirts we brought for the villagers, he said " $\overline{(Gibberish)}$ " which means "Thank You!" in his native language.

But life wasn't always easy for me. From the age of $\overline{(Integer \le 2)}$ I have been learning the art of $\overline{(Long\ word\ for\ an\ ethnic\ art\ form)}$. I've put in years of hard work with my (Guru/Teacher/Sensei). It was never easy because kids bullied me for being different even though 95% of my school does this art form. It finally came together when I had my $\overline{(Somehow\ even\ longer\ word\ for\ a\ final\ ceremony)}$ just in time to write about it for this college app.

At $\overline{(Unrealistic\ University)}$ I plan to take advantage of all kinds of opportunities like research, and research. For example, doing research with $\overline{(First\ professor\ you\ found\ on\ Google)}$ in the $\overline{(Adjective)}$ Engineering department would be a valuable experience. $\overline{(School\ sports\ mascot\ reference)}$ hahaha.

(Callback to the quote at the beginning!)
